SUMMARY

Full-stack engineer with 4+ years of remote experience shipping web and mobile apps for US, EU and Hong Kong clients. Builds TypeScript products end to end with React/Next.js, React Native and Node.js/NestJS, with a focus on LLM-powered features and fast, reliable releases.

PROFESSIONAL EXPERIENCE

Software Engineer, PioneerDev AI LLC - Remote (Colorado, US) **Jan. 2025 – Present**

- Led a team of 2–3 developers delivering 4 concurrent web and mobile client projects in React Native, Next.js, Remix and NestJS, deployed on AWS, Supabase, Fly.io and Firebase.
- Launched 5 production apps on iOS and Android; grew registrations 35% for a Croatian social event platform by building community features and automated influencer sign-ups.
- Built an LLM pipeline that turns text prompts into p5.js animations, cutting animation production time by 60%.
- Shipped AI features including GPT job-description generation, fashion recommendations with object segmentation and background removal, and a UGC video pipeline using Gemini, Kling and Seedance.

Software Engineer, Venus AI LLC - Remote (Texas, US) **Apr. 2024 – Jan. 2025**

- Rebuilt the customer website with the product team, from design through deployment, lifting subscription conversions by 45%.
- Self-hosted a Llama model on RunPod serverless workers and integrated it into the app's AI characters across the React and NestJS stack.
- Owned releases on Ubuntu servers, running the CI/CD pipelines for staging and production.

Full-Stack Developer, PriceMe - Remote (Chicago, US) **Aug. 2023 – Apr. 2024**

- Built features across React (SCSS), Node.js/Express APIs and the database layer (schemas, migrations) in a UI/UX overhaul that raised registrations by 17%.
- Integrated MailJet, OneSignal and Heroku cron jobs to automate emails, push notifications and scheduled tasks.
- Ran Heroku CI/CD pipelines for staging and production, making releases more consistent.

Frontend Developer, Reward Holdings Ltd. - Remote (Hong Kong) **Aug. 2022 – Aug. 2023**

- Turned Photoshop mockups into responsive customer portals, internal tools and landing pages in React and WordPress, contributing to a 26% rise in user registrations.
- Built custom Zendesk themes and Node.js/MySQL automations that reduced manual ticket handling for the support team.

EDUCATION

BS Computer Science, Mapúa Malayan Colleges of Mindanao - Davao, Philippines **2025**

- Dean's Lister, 2020–2025; worked full-time as a developer from 2022 onward
